

DT-430 Kinetic IW In-Wall Electronic Dial Thermostat

Product overview

A simple, attractive electronic dial thermostat, with improved accuracy compared to older dial thermostats. It has a smooth curved design providing an easier grip on the dial.

This version of the DT-430 is an In-Wall version suitable for a 35mm backbox and reduces the thickness to 26mm.

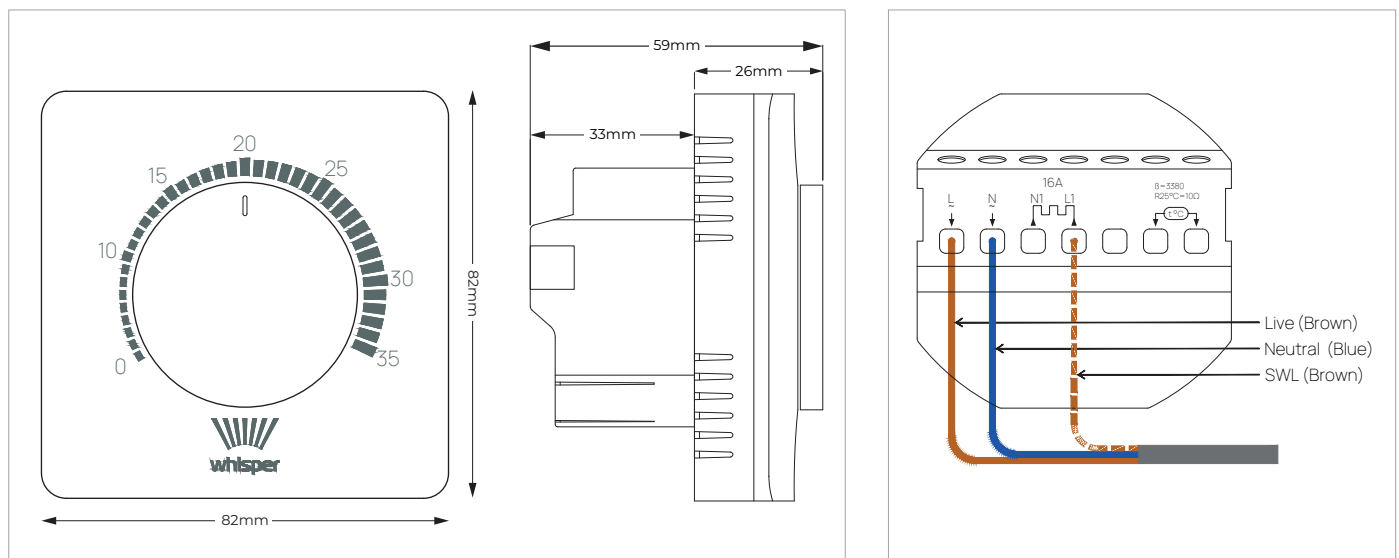

The ring backlit design provides a warm red glow when calling for heat, switching off when up to set temperature.

Remote sensor capable NTC 10k, with an overtemperature safety option.

Accurate to within 1°C.

Technical specifications

Dimensions	82x82x26mm	Product code	CWS-ADT4-030
Weight	145g	Item	230V electronic dial thermostat
Material	ABS+PC	Colour	White, red light from behind dial when calling for heat
Supply voltage	230V	Compatible with	Remote sensor probe Whisper TP-338 series
Power consumption	< 1W	Mounting	In-wall (35mm backbox depth)
Max switching output	16A	Compliance	UKCA and CE
Switch relay output	230V		
Protection rating	IP20		
Settable temp.	10-35 °C		
Display accuracy	1°C
